Project Name	To Supply Leftover Food to Poor
Maximum Marks	2 Marks

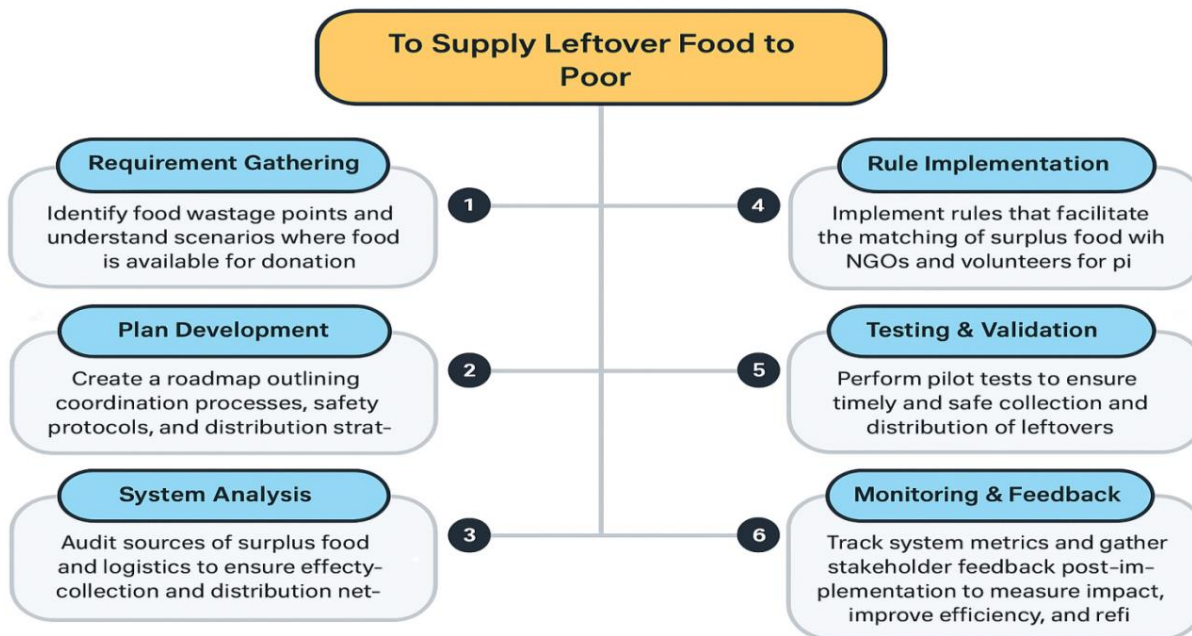

Problem – Solution Fit Template:

The Problem–Solution Fit means identifying a real social issue and providing a practical, impactful solution that addresses it effectively. It helps innovators and organizations understand the root causes, behaviors, and systems involved in tackling hunger and food wastage.

Purpose:

- Minimize food wastage by redistributing surplus food to people in need.
- Build a bridge between food donors (restaurants, hotels, event organizers) and NGOs/volunteers.
- Ensure safe, timely, and hygienic delivery of leftover food to poor and hungry individuals.
- Promote social responsibility and reduce environmental impact caused by food waste.
- Create a sustainable and transparent network that monitors, tracks, and optimizes food donation processes.

Template:

The project **“To Supply Leftover Food to Poor”** addresses a crucial gap in food management and social welfare systems. By creating a structured process to collect, manage, and distribute surplus food from restaurants, hotels, and events to the poor, we significantly reduce food wastage and hunger. This solution not only ensures that edible food is utilized efficiently but also promotes environmental sustainability and social responsibility. With the successful implementation of a real-time coordination platform connecting donors, NGOs, and volunteers, the project enhances transparency, safety, and timely food delivery. This initiative lays the foundation for a sustainable model that bridges the gap between food surplus and food scarcity, contributing to a more compassionate and waste-free society.
